Pilot Logbook - From paper to digital

capzlog.aero

Experience correct flight data

Auto-Import

1. Start free trial
2. Activate Auto-Import connection
3. Configure Day-Night, UTC-LT & notifications
4. Enjoy real time imports

Lean back while your flights are being imported in real-time

Our API integrations synchronize your flight data in real-time with OPS, reservation and planning systems.

Paper

1. Determine number of flights
2. Calculate the price in our shop
3. Offer for remarks and signatures
4. Send us scans/photos

Allow yourself the luxury

Your paper flight record is analyzed by our data specialists and every flight is digitalized at full resolution.

File-Import

1. Download the template
2. Fill in your data
3. Upload and follow instructions
4. Enjoy structured and correct record

Our experts guide you personally

Import your flight data from electronic sources into your capzlog.aero account on your own. Our import feature validates your data on the run and eliminates any inconsistencies and errors right during the import with your feedback. Get the Excel template [here](#).

Manual

1. Start free trial
2. Download the app
3. Add flights via single page entry
4. Enjoy our validation standards

Flight entry tailored to your exact needs

The recommended option for data enthusiasts remembering the details of every conducted flight. The single-page flight entry features all of capzlog.aero's validation standards. Keep getting faster with intelligent and configurable defaults tailored to your exact needs.

Manual + Initial Values

1. Pick specific date in the past
2. Register initial values as per that date
3. Record flights up to today
4. Repeat process (with earlier date)

Combine the best of both worlds

Start quickly with recent experience in full resolution and FCL.050-totals correct. The initial values can be edited later and moved further into the past. In this way, you can achieve full digital resolution step by step.

Initial Values

1. Register initial values as per today
2. Make use of initial values per type/variant
3. Start to record flights from today on
4. Enjoy capzlog.aero

Start pragmatically & right away

Switch to a digital logbook in no time with initial values. Specify the main FCL.050 category totals per type/variant and have them counted towards all the relevant totals. We do always recommend to move towards full resolution of your flight data. This option allows you to do this later when currently being in busy times.

Officially approved EASA AMC Part-FCL compliance

Your benefits with capzlog.aero

- ✓ Record correct flight data
- ✓ Your data is backed up regularly under the regulations of the GDPR
- ✓ Your data is processed with the highest level of care in data centers in Switzerland
